Potential competing interests: No potential competing interests to declare.

The topic that the manuscript takes up is quite interesting. However, some issues must be addressed:

1. The research-added value must be accentuated.
2. The method with which questions were coded and analyzed is missing. The statistical technique through which results are provided must be described.
3. Results must be discussed in light of previous relative studies or even in the spirit of the research questions that are still missing.
4. Slight English proofreading is needed.
