Potential competing interests: No potential competing interests to declare.

Introduction:

1. May highlight the research gap in terms of lack of evidence assessing the impact of mental health training in the context of Portugal
2. May add discussion on the ES'COOL project in the introduction part

Methodology

1. How to justify the constructs/items with reliability coefficient $<.6$
2. May add normality test results

Discussion

1. May discuss from the aspect how the implementation of the training (content, activities) could contribute to the effectiveness of the training.
