Potential competing interests: No potential competing interests to declare.

This work research provides insights into the issue of Per- and Polyfluoroalkyl Substances (PFAS) exposure in Abuja, Nigeria, and highlights the lack of awareness among the population about the associated risks. However, there are some areas that need attention and improvement; the next observations indicate the issues to be addressed.

For clarity and structure,

The abstract needs clear organization and structure for better readability and understanding; it could be as follows:

1. General sentences about the topic.
2. Objective
3. General methodology
4. And relevant results

Spelling and Grammar

In the first sentence of the abstract, "subsbtances" should be "substances."

The document has an overuse of "being." For example, in the fourth paragraph, it should be "been."

In the section of Recommendations, the first paragraph contains "programme," which should be "program."

Data Presentation

Interpretation of the analysis of data presented in Tables 1 and 2 is needed, and consider the implications of the results to understand the exposure of the population in Abuja.

Citation Format

Keep uniformity and consistency for citing; for example, the citation for "Liu and Avendano (2013)" is not consistent.

Research Scope and Limitations

Please mention the limitations, mainly during the data acquisition, during the research process.
