**Potential competing interests:** No potential competing interests to declare.

It is a very new theme paper, using modern technologies, literature review type, I understand.

In this case the method of review analysis should be specified. It is too simplistic to choose a series of articles and arbitrarily set analysis criteria like - AI use cases in third institutions, Potential benefits and challenges of AI integration, etc.

Also, I don't understand how the articles from 2015-2023 were selected? What combinations of search words were used, what databases were they taken from!
