Potential competing interests: No potential competing interests to declare.

The review article entitled "The Role of Plant Growth-Promoting Bacteria (PGPB) in Soil Fertility Restoration in Chemical-Contaminated Areas" provides involvement of beneficial microbes in improving the soil fertility in contaminated areas.

Title needs to be modified as <u>The Role of Plant Growth-Promoting Bacteria (PGPB) for Restoration of Soil Fertility in</u> Chemical-Contaminated Areas

Authors need to provide details for contaminated area in the form of table of figure.

Role of reported PGPB for the same purpose should be listed in a table.

Finally the overall concluding figure is also required.

Overall review is well written and can be accepted after considering the above-mentioned suggestions.
