

# Review of: "Spatio-Temporal Analysis of Precipitation Patterns in Xinjiang Using TRMM Data and Spatial Interpolation Methods: A Comparative Study"

Chandrani Chatterjee

Potential competing interests: No potential competing interests to declare.

Studies on changing rain pattern is surely a need of the hour. So the topic is interesting .. But there are few points ....

1. The major motivation behind the work is not clear from the study..
2. The state of art has to be more robust.
3. The figure axis/ legends have to be in English.
4. A discussion section should be added to highlight the actual scientific contribution of the study
