Potential competing interests: No potential competing interests to declare.

1. I would avoid the use of ellipsis (...) at the end of sentences.
2. The article raises awareness of a group of built heritage sites from the colonial period of Vietnam - their valorisation should include their tangible and intangible aspects.
3. A clear valorisation using modern approaches, such as digital storytelling, 3D documentation, virtual musealisation, would greatly benefit their sustainability.
4. The educational value of the conservation and valorisation of these assets is undermined and could be enhanced.
