Very good Policy dialogue for nutrition as it covered from leadership to implementation.

However, there is a gap to discuss on over nutrition and balance diet as dialogue for nutrition, not for malnutrition.

Nutrition and diet directly related to Non Communicable Diseases issues, hence there should be discussion in this regard.

There is weakness on data in introduction.

Sustainable Development Goals related information and action needs to highlight in related theme.

Role of men and participation of men is equally important in each action to bring fruitful outcome.
