Potential competing interests: No potential competing interests to declare.

1. The manuscript needs to pay more attention to the detail of typing to avoid contraction, such as : we'll (it had better to change it into "we will collect" or even "we collected" because the activities has been done) and also typo, such as the terms" statistics" in the Table 2 (it is typed satatistics}
2. Bullet and numbering should be reduced and replaced by a coherent narration
3. Conclusion does not need to rewrite the research results, it will be better to focus more on the research implication, research limitation, and future research agenda and all of them are written in coherent narration instead of bullets and numberings.
