

Review of: "Artificial Intelligence and Digital Technologies in the Future Education"

Feng Yao

Potential competing interests: No potential competing interests to declare.

Adequate literature review, strong awareness of the issues and relevance of the chosen topic. Disadvantages:

1. Too many key words, just filter out 3-5 important ones
2. The argumentation in the fourth part is more like a literature review and lacks its own research methods and conclusions
3. The discussion at the end of the text is also inadequate
