

Review of: "The Role of Green Legacy in Promoting Sustainable Development and Combating Climate Change"

Sundas Hanif

Potential competing interests: No potential competing interests to declare.

Overall, this is a clear, concise, and well-written manuscript. The authors make a systematic contribution to the research literature in this area of investigation. There are few recommendations to enhance the quality of this manuscript.

1: Abstract should be start with the description of main work which has been done or by stating the problem and aim of the study. Researchers mentioned the research gap in the start and little detail is available about the purpose of the study, methodology, and target population of the study.

2: Researchers should include more in-citation as it is mandatory to refer previous research studies.

3: Kindly mention your target population, sampling technique, analysis tools/software more precisely.
