Review of the Manuscript Qeios OT971L

The manuscript titled "The Vicious Circle of Climate Challenges With Soil in 5 Continents Caused by Low Cognitive in the Process of Agricultural Revolution in the World" is very interesting in its content. However, before publishing, it would need some review.

I would suggest a more structured abstract so I could have a full overview of the paper just by reading it.

There are several typographic mistakes that should be corrected.

Besides, citations need to be reviewed for format and style.

I would like you not to use the symbol "!" to finish a sentence; I am sure you can find another way to emphasize what you mean.

In all the text, I would suggest shorter sentences; sometimes they are too long and difficult to read. Furthermore, the text is very dense; I would suggest separating it into paragraphs.

Also, I miss the dates and quotations in the captions of some figures, and where they have been obtained from.

Although there are many references with their DOI and Link, I would appreciate DOIs and links in more references, as much as possible.

With respect,
