

Review of: "Raising Adaptive Capacity to Climate Change in Energy and Food Sectors of Egypt"

Ali Soliman Gargoum¹

¹ United Arab Emirates University

Potential competing interests: No potential competing interests to declare.

- The purpose of the study is clearly defined, and the introduction is concise.
- The manuscript is Original Research
- The figures and graphs are appropriate, appropriately labeled, and show the important results.

However, the section on analytic tools and statistical methods needs to be expanded (statistical analysis is primitive)

Recommendation: to be published with minor corrections in the methodology section
