Potential competing interests: No potential competing interests to declare.

Dear Author

Please note that you have proposed a model but it is not clear what are the theoretical assumption of the study. Please clarify the conceptual framework of the study. Besides, the introduction and discussion section need major revision. Please add some new papers postdated 2022-2023. I am still confused with challenges you have only cited in the abstract "VAutomated Writing Evaluation (AWS) systems have emerged as a promising solution to address these challenges". The notion of "The Longformer and Bigbird models were fine-tuned and evaluated for discourse classification." is vague. Please revise the literature section thoroughly.
