

# Review of: "Tweeting AI: A Machine Learning Approach for Bird Species Detection and Classification"

Dr Rajesh Pasupuleti

**Potential competing interests:** No potential competing interests to declare.

The way of addressing problem , approach and implementation results are good , need to appreciate authors work,

1. Requested to remove general theory and content
2. include accuracy measures and comparative based analytical results with models
3. requested add more references
4. quote citations
5. represent architectural diagram
6. include memory, cpu or gpu, time taken for model classification results
