Review of: "[Commentary] #BetterPoster: The gateway to accessible science"

Aleksandra Grbović

#BetterPoster initiative.is a very important topic, especially with first hand experience of the difficulties of working with posters. But, from article is not clear how can posters become accessible wit using of #BetterPoster initiative? What exactly billboard-style? Practical details is missing, please give as a better explanation.

Also please, consider covering the following topics in the article:

- why is virtual format for posters more accessible for people with VI? Is there any empirical dates?
- Give us explanation what is Universal Design, and why is so important to all people with disability (not only for VI, or researcher).
- And please explain which research from educational psychology and how is user experience design was used?
