introduction

“In the case of individuals with disabilities, per se, for those belonging to the umbrella of neurodiversity, crime comes much later or may be manifested in the form of general misconduct”- reference please...what terms are we sticking with Autism or disabilities.

This paper needs to be re worded and grammatical errors corrected. The authors need to carry out a major proof reading of the paper....i suspect a lot of their thoughts is in their native language which might be difficult to translate to English (I have experienced it before).

It is difficult to follow the methodology as it was not very clear.

Choice of topic is very good.
