**Dear Authors,**

I really appreciate your hard work, but some amendments need to be made to improve the quality of the study.

## **Abstract**

**Background:** The authors need to focus on the consumption of beverages, not on the consumption of water, i.e., the main aim of the study.

**Methods:** Better to use [Descriptive statistics (and T-tests) were used to summaries the participants' characteristics and beverage consumption].

## **Introduction**

The authors have to focus on the main aim of the study, which is the consumption of beverages, i.e., the patterns and types of beverages used to be consumed by similar age groups of the participants in the study.

Have to include recommendations that support the aims of the current study.

## **Method**

**The inclusion criteria** include students who are interested in participating in the current study and agree to sign the consent form.

**Data collection instrument:** The authors have to include a part about the validity and reliability evaluation of the questionnaire used.

## **Results**

It is better to focus on the type and pattern of beverages consumed by the participants.

## **Discussion**

It is better to focus on explaining the type and pattern of beverages consumed by the participants; this will give more

depth and value to the study and its results.

### **References**

The author has to include more up-to-date references.

**Editors need to focus on the similarity index report.**

**So the decision will be: major corrections need to be reviewed again.**
