Potential competing interests: No potential competing interests to declare.

Well-written, well formatted manuscript with clear search strategy and search results.

Review follows the PRISMA guidelines correctly.

All critical points related to sexually transmitted infections of migrated spouses well covered in the discussion.

All findings and evidences are well supported by appropriate citations.

Appropriate tools and checklists used for quality assessment.

Most of the studies from Asia are cited. Very few studies from Africa and hardly any studies from Western world covered..
