Review of: "The Spectral Theory Of Periodic Ordinary Differential Equations"

Masoud Saravi¹

1. Science and Technology, Shomal University, Iran, Islamic Republic of

This article looks to me like a part of, for example, a dissertation or textbook which can be useful for a classroom lecture. Even its style of writing is not suited for a journal, but in general, it is a good text that may be suitable for your journal by adding an abstract to mention what it will be about and a conclusion about the results the author got.
