

Review of: "The Design of a MOOC on Health Behaviors: A Practical Blueprint for the Instructional Design of MOOCs"

Sanjay Mohapatra

Potential competing interests: No potential competing interests to declare.

The article is written from a practitioner's point of view. The step-by-step approach given in the paper, along with the tabular way of describing the problems on the left-hand side and suggested solutions on the right side, is good for anyone looking to start such initiatives. Discussions on tools available, cloud platforms that can be used, and ballpark estimates could have made this a complete guide for an entrepreneur. Overall, this can be part of a guidelines document.
