Greyhound

National Cancer Institute

Source

National Cancer Institute. *Greyhound*. NCI Thesaurus. Code C53914.

The Greyhound is a sleek, contoured dog built for speed with a very deep chest and a flexible, curved spine. The head is long and the skull is wide between the ears. The small rose ears are folded back. The coat is short and smooth and comes in all dog colors. Height: 27-30 inches (68-76 cm.) Weight: 60-70 pounds (27-32 kg.)
