

# Review of: "The use of tele-education in medicine, during and beyond the COVID-19 pandemic: A commentary"

Muhammad Idrees Anwar

Potential competing interests: No potential competing interests to declare.

Nicely written article with elaborate work. However having said, in my humble opinion few improvements are required. The Introduction is very good but the methodology is incomplete and insufficient. kindly rewrite , explain detail for literature review process including inclusion and exclusion criteria for selection. Results needs to be rewritten. Please discuss your results in discussion and justify your findings. Good job and i am sure you can further improve.

regards
