

# Review of: "Assessment of Microbiological Quality, Phytochemicals, Trace Elements and Proximate Analysis of Bio-Clean II Herbal Remedy"

Hunain Ali

Potential competing interests: No potential competing interests to declare.

The article is well-written, well-structured, and properly executed. But I want to add some points;

1. Composition of formulations must be discussed.
2. Introduction must contain more literature.
3. There are some formatting mistakes.
4. There is a need for adding some latest literature.
5. Material and methods portion is not properly discussed.

Apart from these points, I highly recommend this article.
