Review of: "Fabrication of Soft and Comfortable Pressure-Sensing Shoe Sole for Intuitive Monitoring of Human Quality Gaits"

Fahad Mohanad¹

1. Prosthetics and Orthotics Engineering Department, Al-Nahrain University, Baghdad, Iraq

Does the manuscript need clarification on the following points:

- Has the accuracy and repeatability of the device been verified with repeated use?
- How can this technology be compared with standard devices?
- Can this device be applied in different clinical or research environments?
- Have the factors that may affect the device's measurements, such as noise signals or environmental interferences, been studied?
