Potential competing interests: No potential competing interests to declare.

1-The abstract should provide a concise and clear summary of the paper. In this case, it would be helpful to include a brief statement on the actual loss functions of Artificial neural networks in cancer. This will give readers a better understanding.

2-The introduction provides a clear overview of the loss functions of Artificial neural networks in cancer.

3-For ease of reading, I suggest that the authors itemize the innovations and contributions of the paper in the Introduction section.

4-In the Conclusions section, please add more future directions about the potential and applications of the new method.

5-Limited study and references have been provided in the introduction. Some recent references should be added.

6-All abbreviations must be accompanied by a full description.
