5-HT₄ Agonist TAK-954

National Cancer Institute

Source

National Cancer Institute. *5-HT₄ Agonist TAK-954*. NCI Thesaurus. Code C162880.

A serotonin (5-HT) type 4 receptor agonist with potential gastrointestinal (GI) prokinetic activity. Upon administration, 5-HT₄ agonist TAK-954 targets and binds to 5-HT₄, thereby enhancing its activity. This may enhance GI motility, decrease GI tract and colonic transit time and improve constipation.
