Dear Dr. Kanbiro Orkaido Deyganto,

Congratulations on choosing such an important topic!

The abstract mentions that the paper will propose a method to direct to PhD students regarding how to answer questions during the defense. In my point of view, it is considered an “Experience Report”. I advise you to research it and read other papers with the same format. It has been written as an informal interview of a commercial magazine not as an academic paper.

Anyhow, it is necessary to structure the writing as an academic paper. The way it is presented is just exposing the answers, however, it does not relate to scientific evidence or a method to justify why they were chosen as a reference. A brief literature review could be in the introduction as a theoretical basis of the paper. It is essential to point out other authors throughout the paper.

Good job!
