major comments:

1. while the case study objective is clear but the rationale is not properly addressed in introduction section. like role of Zn in Covid 19? role of quercetin and Vit D in Covid -19? their molecular mechanism of action in Covid 19? other clinical trials? I will suggest authors to consult PubMed articles and cite these seminal articles PMID: 33094446, PMID: 34284268, PMID: 33146028, PMID: 35393674, PMID: 33000510, PMID: 34150487
2. how the doses of Zn, Quercetin and Vit D was chosen? mentio it in methods section
3. discussion section is weak, authors should construct their discussion around other studies reporting the same supplementaion with or wothout other repurposed drugs
