Potential competing interests: No potential competing interests to declare.

Thank you for writing the manuscript, and highlighting the importance of ANC in MCH.

Full comments and suggestions are in the word document that will be **posted on here**.

In summary, please revise the results section especially the narrative. The narrative is a repetition of what is in the tables and ideally should only capture/highlight the key finding. Also, re look at analysis where you indicated ORs. They were on one segment. Please have a reference group and do odds for the rest.

The discussion seemed to have more less a repetition of results. Please revise accordingly.

The conclusion and recommendation did not bring out the salient findings of the research. Please revise.
