Potential competing interests: No potential competing interests to declare.

1. Kindly check the title, especially the nomenclature.
2. In the abstract, line 2, kindly check the space before "fed."
3. In the discussion, line 2, several studies have been mentioned, but only one reference was used.
4. In tables 1 and 2, there are no standards used for the parameters to compare the experimental results with. I recommend you to use the standards so the results can be compared with them and so that they could serve the purpose of the study.
5. Overall, it was well written.
