Potential competing interests: No potential competing interests to declare.

A worthwhile addition to India's flora, and an intriguing topic regarding the diversity and distribution of Gesneriaceae.

Additional information regarding genus traits ought to be included in the introduction. It is time to update the number of species. The origin and distribution of the species must be included. First off, the importance of *Henckelia* and Gesneriaceae in relation to India's biodiversity is not discussed in the introduction. Pls discuss. Does this specific plant family's taxa fall into any of the IUCN's endangered categories? Kindly mention.
