Thank you for allowing me to review this manuscript. Some of my comments to increase the quality of the paper.

- Introduction;
  - 1<sup>st</sup> line should write the full spelling of Human Immunodeficiency Virus (HIV) rather than HIV itself.
  - 7<sup>th</sup> line should write "PLHIV by 2018" because already a full spell in the 3<sup>d</sup> line for PLHIV.
  - 7<sup>th</sup> paragraph should change the term "my level of knowledge..." to "our.." because this study was not only done by 1 people
- Methodology; Should be included a statement about ethical approval
- Results; Figure 2;
  - Please use an appropriate Chart Title to replace "Percent",
  - Percent should be in the Axis title
  - The value for the data label should be in decimal point (not comma). Please make it proper and presentable.

The general article structure and content of the manuscript are well-organized and suitable for publication.
