Peer Review

Review of: "Neurodevelopmental and Psychiatric Outcomes in Children With Congenital Heart Disease: A Clinical Review"

Arlinda Maloku[1]

1. Pedaitric Cardiology department, University of Prishtina, Kosovo

This is a strong, contemporary clinical review addressing an important topic in pediatric cardiology and developmental medicine. The manuscript is clinically valuable and conceptually well-developed. Expansion of lesion-specific outcomes, psychiatric discussion, and practical implementation guidance would further strengthen the paper and broaden its utility for clinicians.
