Thank you for considering me as a reviewer of the current manuscript. The manuscript has many results. However, some suggestions should be adopted, and corrections should be made to this article to improve the overall quality of the paper.

- 1) Overall, the abstract contains the objectives, methods, and key findings of the manuscript.
- 2) It would be better to include the value of the standard deviation for the results in Table 2 and Table 3.
- 3) The manuscript reports only changes in data. Please use relevant theories to connect and explain the changes in results as reported in the manuscript.
- 4) Figures 4 and 5 are not well drawn (different sizes). For Figures 4, 5, 6, and 7, the labels on the Y- and X-axes are inappropriate.
- 5) The methodology section lacks details of the experiments performed.
- 6) More recent years of references should be included in the manuscript.
