

Review of: "Interrogating the Role of Opinion Leaders in Media's COVID-19 Awareness Campaign to Mass Audience"

Ignatius Enda Panggati

Potential competing interests: No potential competing interests to declare.

The topics raised are interesting, and quite up to date with current conditions, where the COVID-19 pandemic has just occurred. However, there are several things that concern me about this paper, so maybe they can be added to enrich this paper.

1. In the introduction section, please add the importance of the research in this paper, and also mention the research questions raised in this paper.
2. Please state more clearly about the respondents from the study such as age, occupation, etc., and the reasons for the methods used in collecting respondent data.
3. from the implications side. Please add the implications of this research for theory development.

Thank You
