Potential competing interests: No potential competing interests to declare.

This paper is well written and well organized however authors need to include these aspects too.

The author needs to discuss the novelty of the work and this research will be more beneficial if the author relates this work with the implementation aspect too.

Various benefits of digital health records should be discussed in a separate section.

Are there any healthcare firms that are maintaining the digital records of the patients? If yes kindly cover this in the study and if no then focus on what are the challenges related to this.

Add some Venn diagram or bar diagram in the section "Prioritizing Digital Health: Key Focus Areas" for presenting data related to digital health.
