Potential competing interests: No potential competing interests to declare.

Abstract should be concise and highlights only important information regarding your work. Remove the following “remove Spearheaded by the Technological University of the Philippines’ College of Engineering, led by former Dean Benedicto Fortaleza as the project leader, and involving the crucial contributions of the Civil Engineering (CE), Electrical Engineering (EE), Electronics Engineering (ECE), and Mechanical Engineering (ME) departments”

The first section - Instead of naming it **Social Impact**, it is better to rename it to “**Introduction**” or “**Overview on Study Area**”. And provide a structured introduction where research problem is clearly identified before discussing about the Hybrid Pico Hydro Solar Generation System.

Benchmark and Needs Assessment Survey: It would be useful if the authors could provide the number of people involved in the survey/study

In **Methodology**, it is advised that the authors include a few diagrams of the system developed to help readers understand the work done in this article.
