Dear authors, I would like to congratulate you on the excellent work developed. The work "Evaluating Hydrologic, Geomorphic, and Vegetation Parameters to Assess Natural, Living, and Hardened Shorelines along the Northern Gulf of Mexico" is very interesting and it having a complex methodology, that denotes you had a lot of work in data processing and methods.

I have two suggestions for your improvement:

Refer to the YSI acronym, when first mentioned, in full. In Table 2, use points, standardize data and decimal places.
