

Review of: "Medical Nutrition Therapy in Hospitalized Pulmonary Tuberculosis Patients: A Retrospective Analysis of Its Effect on Monocyte-to-Lymphocyte Ratio (MLR), Neutrophil-to-Lymphocyte Ratio (NLR), and Prognostic Nutritional Index (PNI)"

Ashutosh Singh

Potential competing interests: No potential competing interests to declare.

Keywords should be mentioned in alphabetical order.

Kindly justify the study design of this study? Study type:

Cross-sectional study or observational type of case-control study?

Each table should consist of a head and a footnote.

Type of statistical method used for each table? Student t-test or ANOVA?

95% confidence intervals should be included in the table along with p-values.

Kindly modify your tables to standard form.

Kindly include correlation regression analysis for different parameters.

Also, please do the ROC analysis for parameters like MLR, NLR, and PNI.

Regards,
