Disintegrin and Metalloproteinase Domain-Containing Protein 10

National Cancer Institute

Source

National Cancer Institute. *Disintegrin and Metalloproteinase Domain-Containing Protein 10*. NCI Thesaurus. Code C91860.

Disintegrin and metalloproteinase domain-containing protein 10 (748 aa, ~84 kDa) is encoded by the human ADAM10 gene. This protein plays a role in the mediation of proteolysis of plasma membrane proteins.
