**Title:** An Investigation of The Phytochemical Richness of Fresh Musa Paradisiaca L. (Plantain) Stem Juice and Its Anticonvulsant Potential on Pentylenetetrazole (Ptz)-Challenged Rats

Thank you very much for sharing this article for review. This article is well written. My comments are below-

1. Explain briefly your research questions in the introduction.
2. Phytochemical analysis of MP stem juice-briefly explain the methods.
3. Acute toxicity and lethality (LD50) study-Explain briefly.
4. Why did you use these experimental animals? Justify your choice.
5. Did you check these phytochemicals using HPLC? If possible, add these phytochemical screening data.
6. Explain all the results with the critical importance of your findings.
7. Make a flowsheet/draw a figure like the graphical abstract.
8. Add more recent references.
