Arginine/Omega-3 Fatty Acids/Nucleotides Oral Supplement

National Cancer Institute

Source

National Cancer Institute. *Arginine/Omega-3 Fatty Acids/Nucleotides Oral Supplement*.
NCI Thesaurus. Code C62534.

A specialized enteric nutritional supplement, containing substantial amounts of polyunsaturated fatty acids, arginine, and nucleotides, with potential immunostimulating activity. Compared to traditional enteric nutritional supplements, the omega-3 fatty acids/arginine/nucleotides oral supplement may enhance the growth, development, and activity of key components of the immune system, including lymphocytes, antigen presenting cells, and various cytokines.
