Potential competing interests: No potential competing interests to declare.

Overall Impression: The subject investigated by the researchers holds scholarly relevance. The underlying theories and methodologies are sound.

Please ensure consistency in referencing. You could stick to APA, Harvard style, etc.

Given that the work has been completed, the language should preferably be in the past tense as opposed to the future tense.

Please merge the objectives into the introduction as one paragraph in the introduction instead of making them separate sub-sections.

Under the definitions of the explanatory variables, empirical works that have used these variables and findings could be cited.

Please compare the findings of the study to more recent papers. The references are quite outdated.

Implications of the study's findings for policy could be added to the conclusion.
