Potential competing interests: No potential competing interests to declare.

Title: Title should be revised as the current one seems like a simple sentence

Abstract: No more than one paragraph is suggested in the abstract. Moreover, the current abstract sounds more like a methodology; please revise it.

Keywords: Use the MeSH keywords.

Methodology: Why are 18 adult albino mice mentioned, and what procedure did they undergo? How were the control groups and the standard treatment group chosen?

Abbreviations: If NC is an abbreviation for no convulsion, then why is "normal control" mentioned in the detail?

References: References should be revised and corrected in format and text.
