Status of Tumor Eligibility for Definitive Local Therapy

National Cancer Institute

Source

National Cancer Institute. *Status of Tumor Eligibility for Definitive Local Therapy*. NCI Thesaurus. Code C139742.

The status of a tumor based on its characteristics, such as morphology, location, size, presence or absence of carcinoma in situ, vascular invasion, metastasis, and other empirical features with or without biological and molecular basis, that is eligible for definitive local therapy (e.g. surgery, radiation or ablation that is chosen as the primary treatment modality).
