Potential competing interests: No potential competing interests to declare.

The contents and information are interesting and well organized. The below comments may be considered.

1. The botanical name may be *Solanum lycopersicum* (italic).
2. The production data can be updated.
3. The names of some of the major products, such as paste, puree, and concentrate, as well as dried tomatoes, may be added.
4. The use of tomatoes in fresh salads, burgers, and kitchens can be considered as well.
