

Review of: "Effective use of Waste Materials: A Case Study of Utilization of Fly Ash in Flexible Pavement Structures"

Meenakshi Sharma

Potential competing interests: No potential competing interests to declare.

The article provides an overview of the use of fly ash in flexible pavements. Although the article refers to a number of relevant journal articles, the overview as a whole is not coherent. A brief summary of each article is given in a paragraph in each section. It would be better to do this in tabular form. For a coherent and detailed overview, it is also necessary to discuss and compare the results of different studies in detail. A section on future research areas would be better.
