Potential competing interests: No potential competing interests to declare.

The submitted paper was well-written with an interesting topic. The paper shared a bleaching case with the use of an ultraviolet device that could reduce the time of the procedure.

All the information related to the treatment was well-written with details (mechanism, beneficial effects) and was also thoroughly discussed.

Strength of study: introducing a new system for bleaching to improve the process.

Limitation: as we have a similar method with laser bleaching, it is suggested to compare this method with laser bleaching.
