Potential competing interests: No potential competing interests to declare.

The author has conducted research on a pertinent topic and has amalgamated both perceptions towards inclusion and the teaching strategies used by the teachers. Few suggestions-

- 1) It would be nice to have a review of literature section after the introduction.
- 2) Rationale for the study and objectives/research questions would give clarity to the reader about the purpose of the study.
- 3) Discussion of the results could be done separately and with cross-citations.
